

JOSEPH KARIUKI

Clinical Medicine Practitioner | Data scientist | Health Data & Reporting

Nairobi, Kenya | josekari328@gmail.com | +254 702 148 205 | linkedin.com/in/joseph-kariuki-936092193

PROFESSIONAL SUMMARY

Clinical Medicine practitioner with hands-on experience in patient assessment, treatment plan review, clinical audit, and structured health reporting across medical, surgical, paediatric, and obstetric services. Skilled in reviewing patient histories and records to verify that treatment correlates with diagnosis and established medical protocols, coordinating care across multidisciplinary teams, and preparing daily, weekly, and monthly clinical reports. Combines sound clinical judgment with strong data-analysis and Microsoft Office skills to support cost containment, accurate benefit adjudication, rapid turnaround times, and excellent client experience in a health insurance case management environment.

CORE COMPETENCIES

Treatment Plan Monitoring | Care Coordination | Clinical Audit (MPDSR) | Turnaround Time (TAT) Management | Provider & Stakeholder Relations | Negotiation

Health Education & Wellness Programs | Chronic Disease Management (CDMP) | Regulatory Compliance & Data Protection Act | Report Writing | Health Data Analysis

PROFESSIONAL EXPERIENCE

Medical Intern | Maragua Level 4 Hospital, Murang'a, Kenya

July 2025 – Present

- Review patient histories, records, and treatment plans daily across medical, surgical, paediatric, and obstetric wards, verifying that management correlates with diagnosis and adheres to established medical protocols.
- Conduct MPDSR mortality audits and case reviews for the Internal Medicine department, analysing 13 mortality cases in a single reporting period, identifying protocol-adherence gaps, and presenting findings and recommendations to consultants and hospital management.
- Perform daily inpatient follow-ups and ward rounds, monitoring patient improvement, escalating deteriorating cases, and coordinating discharges and referrals to ensure timely, quality, and cost-effective care.
- Prepare admission records, discharge summaries, and referral notes in compliance with Kenya MOH guidelines and the Data Protection Act, maintaining accurate, audit-ready documentation.
- Deliver patient education and health talks on chronic disease management and preventive care during outpatient clinics.
- Coordinate care across multidisciplinary teams (consultants, nursing, pharmacy, laboratory), resolving clinical queries within tight turnaround times.

Freelance AI Tutor & Health Data Consultant | Self-Employed, Remote

June 2024 – July 2025

- Designed and delivered training on data analysis, machine learning, and health data applications for learners at varying skill levels, building strong skills in explaining complex information to non-technical audiences.
- Developed applied AI projects, including an NLP-based medical diagnosis support system analysing patient-reported symptoms and histories, sharpening structured, evidence-based clinical reasoning.

Clinical Officer | Wankam Medical Centre, Nairobi, Kenya

January 2024 – June 2024

- Conducted medical assessments, developed treatment plans, and maintained accurate patient records under physician supervision.
- Advised patients on health management and cost-effective treatment options, strengthening a client-centric approach to care.

- Applied health informatics practices to manage patient data and support quality, compliant care delivery.

KEY PROJECTS

Disease Prediction Machine Learning Model | Python, XGBoost, SHAP, Streamlit — 2026

- Built and deployed a diabetes risk-prediction model (AUC 0.843) with fully explainable outputs, demonstrating rigorous, evidence-based clinical risk assessment directly transferable to claims vetting and benefit adjudication.

Patient Data Analytics & Health Dashboard | Python, Pandas, Streamlit — 2026

- Designed and deployed an interactive patient-data dashboard analysing admissions, diagnoses, and outcomes, delivering clear reporting for non-technical stakeholders — the same skill set required for admissions, savings, and exceptional-claims reporting.

Elevate Health Bot – Chronic Disease Management Chatbot | Telegram API, AI Integration — 2025

- Built an AI-powered patient education and follow-up chatbot for a lifestyle disease clinic, automating health-metric collection, red-flag detection, and reminders — directly supporting chronic disease management (CDMP) and preventive wellness programs.

EDUCATION

BSc Clinical Medicine & Community Health | Jomo Kenyatta University of Agriculture and Technology (JKUAT)

Graduated 2024 — Focus areas: health informatics, epidemiology, community health, patient care systems

Data Science & Machine Learning Bootcamp | Online Certification Program

2024 – Present — Python for data science, ML algorithms, data visualization, model evaluation

Kenya Certificate of Secondary Education (A-) | Jomo Kenyatta Boys' High School, Nakuru

2018

LICENSURE & PROFESSIONAL MEMBERSHIP

- Registered Clinical Officer, Clinical Officers Council of Kenya
- Member, Kenya Clinical Officers Association

TECHNICAL SKILLS

Microsoft Office Suite (Word, Excel, PowerPoint, Outlook) | Python (Pandas, Scikit-learn, XGBoost) | Streamlit & Plotly Dashboards | SQL | EHR/EMR Systems | Power BI (Basic)

LANGUAGES

English (Professional Proficiency) | Swahili (Native)
